

## Welcome

Welcome to Forest Lake State High School, a new school with a modern approach to education.

Established in 2001 with unique facilities, the school provides a quality education to meet the needs of 21st century students. In 2007 the school comprises a middle school; years 7, 8 and 9, and a senior school catering for years 10, 11 and 12.

I am committed to making Forest Lake State High School a great place for students, staff and the school community to share the excitement of learning in a challenging, safe and supportive environment.

As principal, I urge you to get involved in determining the future of state secondary education in your suburb. The staff and I can not make Forest Lake SHS a great school alone. Community partnerships are essential. Contact a member of the P&C executive or myself to find out how you can make a difference.

Please browse our site for further information and contact us if we can be of further assistance. I know students will enjoy their education at our high school.

Heather Varcin - Principal
